

CITY WILL HELP  
RESCUE HOMEMayor Lea Takes \$25 Month  
From Associated Charity  
Fund For It.

"Children appeal to me and I am going to do what I can to aid these little boys and girls out there at the Rescue Home," said Mayor Tom yesterday afternoon as he signed a check on the city treasury of El Paso for \$25 in favor of the Rescue Home.

"Hereafter, \$25 will go every month to this institution to take care of those little boys and girls, and the city's donation to the Associated Charities will be cut to \$125 a month instead of \$150," he continued.

"The Associated Charities has included the Sunshine society in its work, but has not included the Rescue Home. Hereafter the city will take care of the Rescue Home to the extent of \$25 a month by cutting off \$25 of the fund we have been giving the Associated Charities."

"If there is anything my heart goes out to it is a little boy or girl without a mother or a father."

WILL SELL MINE PROPERTY  
FOLLOWING FORECLOSURE

Tucson, Ariz., Jan. 15.—Judge W. A. O'Connor of Santa Cruz county, sitting in the superior court here for Judge Cooper, entered a decree foreclosing a deed of trust securing a bond issue of \$172,000 obtained by the Colonial Copper company from the Beeson Trust company of Boston. Allan B. Jaynes, receiver of the company, was ordered to sell it upon the ground on Wednesday, March 22. The property consists of 25 patented claims in the Grawley mountains, 15 miles southwest of Ajo.

Combing Won't Rid  
Hair of Dandruff

The only sure way to get rid of dandruff is to dissolve it, then you destroy it entirely. To do this, get about four ounces of ordinary liquid acetone; apply it at night when retiring; use enough to moisten the scalp and rub it in gently with the finger tips.

Do this tonight, and by morning, most if not all of your dandruff will be gone, and three or four more applications will completely dissolve and entirely destroy every single grain and trace of it, no matter how much dandruff you may have.

You will find, too, that all itching and itching of the scalp will stop at once, and your hair will be fluffy, lustrous, glossy and soft, and look and feel a hundred times better.

You can get liquid acetone at any drug store. It is inexpensive and never fails to do the work.—Adv.

An Old, Family Cough  
Remedy, Home-Made

Easily Prepared—Costs Very Little, but is Prompt, Sure and Effective

By making this pint of old-time cough syrup at home you not only save about \$2, as compared with the ready-made kind, but you will also have a much more prompt and positive remedy in every way. It overcomes the usual coughs, throat and chest colds in 24 hours—relieves even whooping cough quickly—and is excellent, too, for bronchitis, bronchial asthma, hoarseness and spasmodic croup.

Get from any drug store 24 ounces of Pinex (50 cents worth), pour it into a pint bottle and fill the bottle with plain granulated sugar syrup. Full directions with Pinex. Keeps perfectly and tastes good.

You can feel this take hold of a cough or cold in a way that means business. It quickly loosens the dry, hoarse or painful cough and beats the inflamed membranes. It also has a remarkable effect in overcoming the persistent loose cough by stopping the formation of phlegm in the throat and bronchial tubes.

The effect of Pinex on the membranes is known by almost every one. Pinex is a most valuable concentrated compound of genuine Norway pine extract combined with guaiacal and other natural healing pine elements.

There are many worthless imitations of this famous mixture. To avoid disappointment, ask your druggist for "24 ounces of Pinex," and do not accept anything else.

A guarantee of absolute satisfaction, or money promptly refunded, goes with this preparation. The Pinex Co., Ft. Wayne, Ind.

HORTICULTURAL  
SOCIETY HEREValley Fruit Growers to Co-  
operate With State and  
Federal Officials.

A meeting of the horticulturists of the El Paso valley will be held in the chamber of commerce next Monday afternoon for the purpose of forming a County Horticultural association.

The purpose of the association is to cooperate with the state and federal tree and plant inspection bureaus, and to direct the work of an inspector in the El Paso valley. This inspector will be appointed by the state and the U. S. department of agriculture, clothed with power from both, but his salary will be paid by the state and the fruit growers, the chamber of commerce or the county. He will be employed about a fourth of his time at \$100 per month. It was estimated by E. L. Tanner, a state inspector, who is now here going through the valley and inspecting the same.

LeBaron, Chairman. The meeting for the organization of the County Horticultural society will be held at the call of the LeBaron, chairman of the agricultural committee of the chamber of commerce. Mr. LeBaron and Mr. Tanner will be here. S. M. Gillett and G. A. Martin, of this committee, met Monday afternoon with county administration agent A. G. Graham and Mr. Tanner and discussed the matter.

"El Paso valley is the greatest location in Texas for pear growing," asserted Mr. Tanner, "because your climate is such that decreases to which the pear is subject, do not thrive well here. I do not believe there is any blight in your valley, for blight thrives where the climate is moist and it does not act as the case here. In the valley where the affected limbs have the appearance of having been affected by blight, I found that these, probably five or six trees in the entire valley and I have inspected 80 per cent of your orchards here. Blight is a fungus growth that gets into the sap of the tree and is the only fungus growth of this sort. It starts by getting into the buds on the ends of the limbs and then works down. Sometimes it gets into a pear tree through a cut in the trunk, but not often."

Other Tree Diseases. "However, there are other diseases that should be combated here, while they are not bad, you should have an inspector here to prevent inspectors in other states or in Texas, trying to get your shipments. You have the San Jose scale, the codling moth and the brown mite. You also have the plum curculio, which affects the plum trees. It is now time to spray for the San Jose scale, of which there is quite a bit in the valley. It is time to spray for this about the time the trees begin to bud. If these things are allowed to continue, some inspectors are liable to find a pest so affected in a carload shipped into some other state some of these days, and either burn the entire shipment or send it back to El Paso. Then a quarantine would be put on. These things are not hard to stamp out and a County Horticultural board should have charge of the work, in order to back up the inspector."

Number of Trees Affected. Counting demonstration agent Graham, discussing the report of blight on valley pears, said: "There are a number of trees in the valley that look as if affected by blight, but I sent samples last year to Washington to the agricultural department and to Berkeley university. Both of them plant experts could not find any parasites. They could not tell me what the disease was, but they said they did not believe it was blight. It is the same thing that has affected some trees in the Mesilla valley, which the County Horticultural board should have charge of the work, in order to back up the inspector."

BENJ. GUGGENHEIM'S ESTATE  
IS VALUED AT \$2,639,597

New York, Jan. 15.—The report of the transfer tax appraiser, filed Monday in surrogate's court, places the net value of the estate of Benjamin Guggenheim, who lost his life in the Titanic disaster, at \$2,639,597.

Among bequests, Mrs. Forette Guggenheim, widow of Mr. Guggenheim, receives \$752,199; three daughters, Reita H., Marguerite S. and Barbara L., receive shares appraised at over \$400,000 and different educational and benevolent societies sums totaling over \$100,000.

## Cotton

What It Is--  
How It Is Made--

COTTON is a white, downy fibre consisting of delicate, tubular hairs flattened and somewhat twisted. Of all the materials which man converts into apparel, the most extensively used is cotton. It was the first vegetable fibre to be used in the making of clothes, and its history is shrouded in the mists of antiquity.

The cotton seed is sown in ridges, paralleled by furrows for draining. The plants are thinned out, as they grow, and the ground is gone over with hoe and cultivator as many as five times a season. The bloom appears when the plant is eight weeks old, and in six weeks more the boll bursts open.

All cotton is picked by hand, the southern negroes being best adapted to this work by habit and nature. After being gathered, the cotton is run through a gin which removes the myriads of seeds from the fibre. The cotton is then baled and shipped to the mills.

Cotton weaving is accomplished by the most intricate machines that human ingenuity has devised. The looms are marvels of mechanism, making possible the production of vast quantities of cotton at comparatively slight cost.

Unprecedented Values By Reason of This  
Year's Superior Quality of White Wear

THE World of White offers values in white goods and white wear unapproached previously. While the year's out-put is vastly superior to that of other years, the prices asked, are even lower than those small prices which established a new record last year. Every white goods department contributes its values, making this event one of genuine economy for those who take advantage.

"Filipino" Underwear Featured  
The First Time This Class of Underwear  
Has Ever Been Shown in El Paso

IT is hand-sewn and hand-embroidered and rivals in fineness and beauty the best Madeira work. The price is about half, because there is no import duty, the Philippine Islands being American possessions.

The beauty and daintiness of French undermuslins are undisputed, but oh, the prices!

Philippine Undermuslins, equally as pretty, are startling the whole country because of their fineness, their daintiness, but most of all, because of the remarkably low prices.

We've just received our first shipment, in time for "The World of White." You'll appreciate the importance

of this announcement when we say that some of the gowns are to be offered as low as \$2.95, and other garments proportionately low.

For Example; Gowns, Envelope and Regular Chemise, At

**\$2.95 \$3.95 \$4.95**

Beautiful American Made Under-  
garments at Narrow Profits

THIS is an unusually complete collection of new undermuslins, embracing hundreds of styles of fine, dainty white garments from the world's best makers. They are made of the finest Nainsooks, Longcloths, Cambrics, Crepes and Muslins, trimmed with beautiful laces, embroideries, ribbons and hand embroidery work, and they will win universal approval because of their correct fitting qualities and excellent workmanship.

**45c, 95c, \$1.45, \$1.95, \$2.45, \$2.95, \$3.95, \$4.95**

Crepe de Chine Undergar-  
ments at Very Modest Prices

THERE are three features that command these dainty silken garments—exceptional quality, fine trimmings, and moderate prices. The selection includes Envelope Chemise, Petticoats, Gowns, Camisoles, etc., and the prices mean real savings.

CREPE DE CHINE ENVELOPE CHEMISE—In white and pink. Tailored styles and garments daintily trimmed in pretty laces. Regular **\$2.29** to \$3.45 values, at

PETTICOATS AND ENVELOPE CHEMISE—Made of all silk crepe de chine and washable "Society" satin; white and pink. Garments worth up to \$10.50. Choose from the lot while they last in The World of White, at the low price of, **\$5.45** each.

GOWNS AND CHEMISE—Made of lovely grade of all silk crepe de chine, in white and pink. Exquisitely adorned with lovely **\$3.95 to \$4.95** laces. Two lots, at

CAMISOLE—In all silk crepe de chine, "Society" (washable) satin, laces, etc. Embellished most artistically with gorgeous laces, dainty ribbons, etc. Prices range **95c, \$1.45, \$1.95 to \$4.95**, and an extra special lot worth \$1.45, for **95c**

## Samples, and Slightly Soiled Garments

IN the course of a season's selling, many garments are unavoidably mussed and soiled in handling and display. We have grouped all these, which are otherwise in perfect condition—placed them with the manufacturers' samples and marked them at half and less their former prices. Almost every kind of garment is to be found in the lot, including hand embroidered gowns. All marked with blue pencil in plain figures, at
